 **TÜVRheinland**[®]
Precisely Right.

Make your checkmark for REACH!

The new European REACH regulation holds industrial companies directly responsible for investigating their chemical substances for potential hazards to human health and the

environment as well as having their uses and purposes registered.

TÜV Rheinland BioTech GmbH offers all necessary REACH services to companies

headquartered both inside and outside the EU.

Please tick the appropriate box(es) and return this form to us:

chemical industry • drapery and leather industry • plastics processing
pharmaceutical products • coking • petroleum processing • printing industry
furniture • sports equipment • toys • recycling • electrical engineering
fine mechanics • optics • engine and plant production
